

# COST ACTION CA15137

MC meeting, Lisbon, 8th of March 2018

European Network for  
Research Evaluation in  
the SSH

# Work Group 4

- Science Communication Officer
- Improvements on the existing website
- Planning of a full update of the website
- Create and print a flyer for distribution at conferences.
- Put the separate Zotero bibliographies online in a single open resource.
- Planning of future newsletters

# Science Communication Manager

- What's it all about?
- A word on the newsletters

# Website update

- Back up files and database and then safely update all the software
- Repair the content added by your team - for example the DOWNLOADS submenu is broken, ENRESSH NEWSLETTERS menu item has no icon
- Optimize the page for higher performance - minimize and compress all script files to meet the latest standards
- Modify MEMBERS page - your team has grown since we've been working on the page and we can see you're upload big sized images. We could rewrite the loop that displays members and force it to use small, resized and compressed versions of images. This would make the MEMBERS page load many times faster.
- Install a plugin that resizes and compresses images on the fly - it takes care of uploading too big images by itself. All newly uploaded pictures will be compressed automaticly on the server side.
- Configure SSL certificate for secure https connection - lately Google started to encourage websites to use SSL
- CloudFlare CDN configuration for further speed improvement
- Google Analytics and Search Console integration for you to monitor website traffic

# Flyer

➤ Two volunteers, but we need content!

# Zotero
